OUR MISSION

At Nalin Artificial Flowers, our mission is to redefine floral elegance by offering high-quality artificial blooms that bring everlasting beauty into your life. We, at Nalin, aim to inspire joy and creativity while prioritizing sustainability through eco-friendly materials and processes. Join us in celebrating the art of enduring blooms, making every moment more beautiful and sustainable.

OUR VISION

At Nalin, we envision a global standard of enduring beauty. We aspire to lead in crafting lifelike, sustainable floral masterpieces that inspire awe and creativity. Our vision is to be the top choice for those seeking unparalleled beauty that stands the test of time, all while championing eco-friendly practices and environmental responsibility.

NALIN ARTIFICIAL FLOWERS

Nalin Artificial Flowers, based in Thailand, takes pride in being a significant contributor to our nation's flourishing flower industry. Thailand, renowned as the world's second-largest flower-exporting country, boasts an exceptional geography and natural setting that fosters an array of exquisite flowers. This unique backdrop makes Thailand an optimal choice for the cultivation and preservation of our premium product line. To ensure a consistent supply and an expanded assortment of flowers, Nalin Artificial Flowers is now strategically produced in multiple locations.

PRESERVED FLOWERS

Preserved flowers and foliage are natural flowers and greens that have been processed with a revolutionary technology to maintain their fresh appearance for several months or even years!!! Their soft texture and delicate beauty make it difficult to differentiate between Artificial flowers and fresh flowers. They are ideal for gifts, wedding bouquets, interior decoration and even accessories.

VARIETY

Nalin Artificial Flowers offers a wide variety of flowers, sizes and colors. Our product range includes roses, carnations, gardenias, chrysanthemums, orchids, hydrangeas, calla lilies and foliage and many more. With more than 70 colors, nine rose sizes and over 1,000 product references, designers can create arrangements to fit all tastes and budgets.

SAFETY & EVIROMENT

The preservation process empowers us to deliver high-quality, affordably priced products while maintaining a commitment to the environment. Our dedication to quality control commences in the fields through the cultivation of flowers and the use of environmentally friendly raw materials. Every detail of the flower is crafted with utmost care and sincerity.

We believe that through our commitment to the environment and customer well-being, we can cultivate exceptionally beautiful artificial flowers. Adhering to the "healthy flower for a healthy life" policy, we employ recycled materials in both our farms and factory. Moreover, the recycling process extends to repurposing flowers to create compost. Nalin Artificial Flowers is crafted using harmless colorants commonly employed in food or toy manufacturing.

Completion Process of Artificial Flowers:

1 Design & Material Selection

Artists design the artificial flowers, considering size, color, and shape. Materials such as silk, polyester, or plastic are chosen based on the desired realism and purpose of the flowers.

3 Detailing & Quality Control

Additional details, such as veins on leaves or realistic textures on petals, are added to enhance the overall appearance. The artificial flowers undergo a thorough quality control process to ensure consistency and correct any imperfections.

2 Component Assembly & Coloring

Petals, leaves, and other components are cut and shaped, then assembled to form the complete flower. Coloring is applied using various techniques to achieve realistic and vibrant hues.

4 Packaging & Distribution

The finished artificial flowers are carefully packaged to prevent damage during transportation. The packaged flowers are then distributed to retailers, wholesalers, or customers, completing the production cycle.

TREND COLORS

The colors of nature

In the face of frequent news on natural disasters each year, we, at Nalin Artificial Flower, acknowledge the ongoing harm to our environment. While we often perceive "nature" and "civilization" as separate entities, it's crucial to recognize that a damaged environment poses a threat to humanity itself. Shifting away from a consumption-centric society that harms the environment, we advocate for the transition to a sustainable society in harmony with our surroundings.

Amidst the challenges of climate change, a growing focus on nature is imperative. As we continue to embrace a digitized lifestyle, there is a heightened desire for a closer connection to nature in our daily lives.

Therefore, for our 2008 – 2023 trend colors, Nalin Artificial Flower proudly introduces the theme, "The Colors of Nature." Green, representing the essence of nature, is incorporated into every color group. The subtle hues of sunset painting the sky, the deepening greens of roadside plants as seasons evolve – the ever-changing natural environment is a canvas of diverse beauty.

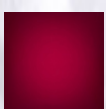

By showcasing this beauty in your arrangements and combining various flowers and plants, you have the opportunity to create deeper, more aesthetically pleasing compositions that resonate with the timeless allure of nature.

Useful tips!

As people are focusing more and more on the environmental issues, the color brown is attracting the attention in many different fields. Brown is the color of the earth, of dirt, and of skin, and it calms people down and gives them the peace of mind. This group uses the brown colors as a base, accented with deep greens and reds reminiscent of plants and fruit. The color scheme is inspired by the cycle of nature: flowers and plants, blessed by rich soil, eventually die and return to the earth.

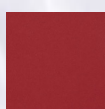

Color used in this Arrangement:

Wine

Cardinal

Wild Cherry

Smoky Pink

Nude Pink

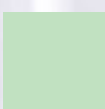

Hazelnut

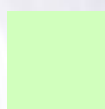

Forest Green

Green

Green

Green

Gray

Natural

Black

Useful tips!

When thinking about how to create a sustainable society, an important keyword that often comes up is the idea of “humanness.” When you think of the “human-like” qualities, such as the human emotions, the human decency, and the human connections, most of people will associate these with the warm colors, like red, pink, and orange.

In particular, the warm colors with the soft tones are popular nowadays, because people want to feel a sense of security and the connections with others.

Color used in this arrangement:

Hazelnut

Nude Pink

Pink Opal

Pink Opal

Hot Pink

Dark Pink

Baby Pink

Baby Pink

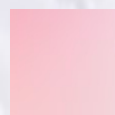

Baby Pink

Baby Pink

Baby Pink

Baby Pink

Pink

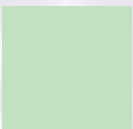

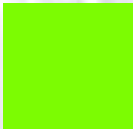

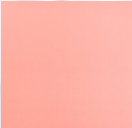

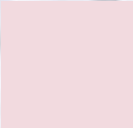

Sherbet Orange

Useful tips!

The key point with this coloring is using slightly dull and calm reds and pinks to bind the arrangements. The accents of green, to represent the nature, are a must. The accents will be naturally mixed with the warm colors, making their softness stand out further.

Color used in this arrangement:

						
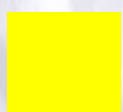

Citrus Green	Citrus Green	Light Green	Grass Green	Dark Green	Light Green	Green
						
Peach	Orange	Orange	Nude Pink	Light Pink	Lilac	Cardinal

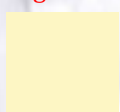

Useful tips!

Our old assumptions about the world would no longer be hold, and it is impossible to predict the future, so many people are deciding to just focus on their own interests and what makes them happy in life. These light, clear, and faint colors seem to light up the road through the fogs, and gently guide us to our destination. The crisp forest air, the morning dew sparkling in the sunlight that shines between the trees, the flower petals visible under the light. We have put a lot of bright colors together, inspired by air and sunlight, that are simply beautiful.

Color used in this arrangement:

Yellow

Soft Yellow

Soft Yellow

Soft Yellow

Apple Green

Citrus Green

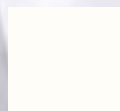

Light Green

Green

Pearl White

Pearl White

Pearl White

Lavender

Useful tips!

The pastel-based color scheme, with the accents of the bright green, light purple, and blue, creates the expressions that are not only sweet and gentle, but also cool and refreshing. Using flowers that look like frosted glass and transparency will emphasize the feeling of airiness.

Color used in this arrangement:

In a bustling city, a quaint flower shop told tales with roses. Alex, seeking the perfect bouquet, chose red for love, white for purity, and a touch of pink for gratitude. His carefully crafted bouquet became a heartfelt messenger. In a hospital room, Sarah sent gentle pink and white roses to uplift her ailing mother. The flowers found their way into weddings, anniversaries, and collaborations with local artists, becoming messengers of emotions in people's lives. The shop, a hub of sentiments, spoke the language of roses, connecting hearts in moments of celebration and solace.
